

EDUARDO FERREIRA

Data Centre Operations Engineer | Critical Infrastructure | Automation

Dublin, Ireland | +353 85 864 8822 | bferreira.eduardo@hotmail.com | linkedin.com/in/eduardobferreira

PROFESSIONAL SUMMARY

Data Centre Operations Engineer with 4+ years of experience supporting 24/7 critical environments and progressing from security operations specialist to shift lead and facility operations engineering. Hands-on knowledge across electrical power, mechanical cooling, network infrastructure, alarm monitoring and time-critical incident response. Builds and maintains AWS-based automation, dashboards and internal web tools while improving workflows, escalation procedures, runbooks and operational standards to reduce manual work, strengthen response consistency and improve visibility across distributed teams.

CORE EXPERTISE

Critical Infrastructure: Data centre operations; electrical power distribution; UPS and generators; HVAC and cooling; CRAH/CRAC; liquid cooling; Electrical Power Monitoring Systems (EPMS); Building Management Systems (BMS); network infrastructure

Operations: 24/7 monitoring; alarm management; incident response; escalation; root-cause analysis; planned work; operational readiness; runbooks; structured handovers; service-level reporting

Automation and Cloud: AWS Lambda, DynamoDB, S3 and CloudWatch; Python; JavaScript; React; Node.js; REST APIs; serverless workflows; dashboards; AI-assisted automation

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS)

Facility Operations Engineer (L3) | Jul 2024 - Present | Dublin, Ireland

- Monitor operational health across multi-site data centre environments, assessing events that affect electrical power, mechanical cooling and network infrastructure.
- Analyse alarms and system states through EPMS, BMS and related platforms; determine operational impact and coordinate timely escalation during planned and unplanned events.
- Manage and coordinate large-scale critical events across global regions, partnering with engineering, operations and site teams to assess customer impact, support data centre recovery and restore stable operations.
- Maintain clear stakeholder communication, accurate event records and structured handovers while supporting root-cause investigations and corrective actions.
- Improve workflows, escalation paths, runbooks and operational documentation to standardise response practices and strengthen readiness across teams and regions.
- Identify repetitive work and build automation, dashboards and web tools using AWS Lambda, DynamoDB, S3, Python, JavaScript, React and APIs.
- Own internal solutions after launch through support-queue triage, log-based investigation, testing, releases, defect resolution and iterative improvements.
- Analyse service-level performance, workload status and recurring trends to surface operational risks, reduce delays and guide continuous improvement.

ICTS UK & Ireland

Data Centre Security Operations | Shift Lead | Dec 2023 - Jul 2024 | Dublin, Ireland

- Led daily shift operations in a 24/7 critical data centre security environment, coordinating coverage, task allocation, alarm response, escalations, reporting and handovers.
- Guided response to security and operational incidents, working with site stakeholders while maintaining access-control and physical-security standards.
- Supported team readiness, coaching and process adherence while sustaining consistent operational coverage.

ICTS UK & Ireland

Data Centre Security Operations Specialist | May 2022 - Dec 2023 | Dublin, Ireland

- Monitored CCTV, access-control and alarm systems in a critical data centre environment, assessing events and maintaining accurate operational records.
- Coordinated incident escalation with engineering and security teams and supported structured shift handovers in a 24/7 operation.
- Built a strong foundation in critical-environment monitoring, risk awareness, incident communication and operational discipline.

SELECTED ENGINEERING AND AUTOMATION PROJECTS

- **AI-Assisted Planned Work Automation:** Combined prompt engineering, scripting and API integration to analyse technical requests, validate structured inputs and improve expected-event handling, removing substantial recurring manual processing.
- **Multi-Region Shift Planning Platform:** Built a React application for live operational coverage, shift scheduling, readiness profiles, time-off approvals, audits and role-based access, supported by automated team notifications.
- **Operational Metrics and SLA Dashboard:** Created a query-driven dashboard for planned-work performance, overdue items, workload status and service-level trends, with scheduled AWS Lambda refreshes for current reporting.
- **Global Weather and Crisis Monitoring:** Developed a serverless monitoring platform using public APIs, geospatial filtering and targeted notification workflows to surface severe events near critical facilities.
- **Operations Communication and Knowledge Tools:** Delivered API-connected dashboards, notification bots and AI-assisted documentation workflows, including standardisation of hundreds of wiki pages while preserving links and attachments.

ADDITIONAL EXPERIENCE

translation.ie

Credentialed Court Interpreter | Portuguese-English | Freelance | Jan 2023 - Jul 2024 | Dublin, Ireland

- **Interpretation:** Provided accurate and impartial Portuguese-English interpretation for Irish court proceedings while maintaining strict confidentiality and professional standards.

EDUCATION

Bachelor of Engineering (B.E.), Civil Engineering - Estacio University, Brazil | 2018

Software Developer and Web Designer Diploma - Pitman Training | In progress, 2026

CERTIFICATIONS AND COURSE CERTIFICATES

AWS Certified DevOps Engineer - Professional | AWS Certification

Machine Learning University (2026): Building Generative AI Applications on Amazon Bedrock; LLM Evaluation; Operationalizing Generative AI with LLMops.

AWS Training and Certification (2022): AWS Technical Essentials; Data Analytics Fundamentals.

Great Learning (2025): Time Management. **Other training:** QQI Level 4 Security; First Aid.

LANGUAGES

Portuguese (native) | English (fluent, C2)
